JOB DESCRIPTION

What if you could make a meaningful impact on a global business, all while learning Quality Assurance (QA) from the best in the business? In this role, you can. As a member of our Quality Assurance team, your goal is to ensure that our applications work as they should and meet customers' needs. To accomplish this, you'll join one of our high-performing QA teams. You'll draw on your testing knowledge and creativity to automate test capabilities and design test and maintenance procedures. You'll also tap our existing test frameworks to tackle

specific problems. We take a collaborative approach to quality, which means you'll work with experienced developers, managers and business partners across the organization. You'll receive coaching, mentorship, and continuous feedback to help you become an even better technologist and professional.

This role requires a wide variety of strengths and capabilities, including:

- BS/BA, ME/MS/Mtech degree or equivalent.
- Proven ability to write automated tests for web and mobile.
- Hands on experience in JAVA, Selenium, Jenkins, OOP's concept.
- Good Understanding of JIRA.
- Good to have Agile knowledge
- Detailed understanding of common defect and data-management tools
- Advanced knowledge of software lifecycles, including Waterfall and Agile, and test automation strategies
- Experience working effectively with teams and stakeholders to develop relationships and achieve common goals
- Proficiency in a business function and some understanding of the broader business context
